

## Special Notice about CEVA Documentation

The CEVA documentation included with your RSL15 SDK contains references to several CEVA documents that are *not* included, such as the RW-BLE Host document and the Functional Specification (FS) documents. Contact CEVA if you need these additional documents.

The CEVA documentation that comes with the SDK is included with permission. You can find it in `<sdk_home>\documentation\ceva\` (where `<sdk_home>` is the installed location of your RSL15 CMSIS-Pack).
